Education

Bachelor of Science (BSc): Computer Science
Toronto Metropolitan University - Toronto, ON

September 2022 - Expected 2027

- **CGPA:** 3.74/4.33
- **Awards:** Faculty of Science 2023-24 & 2022-23 Dean's List, TMU 90%+ Entrance Scholarship
- **Relevant Courses:** Computer Architecture, Data Structures, Database Systems, Software Engineering, Operating Systems
- **Extracurricular Activities:** TMU Environmental Club - Research Committee, Google Developer Groups @ TMU

Technical Skills

- **Languages:** Python, Java, C, C++, C#, JavaScript, TypeScript, Rust, Elixir, Bash, Haskell, Lisp.
- **Technical:** HTML5, CSS, .NET, Next.js, React, Angular, SQL, RESTful APIs, Bootstrap, Tailwind, JQuery, Flask, Express.
- **Developer Tools:** Git, GitHub, Azure DevOps, Visual Studio, UNIX/Linux, Eclipse, MSSQL, Postman, JUnit.
- **Core Skills:** Full-Stack Development, Web Development, OOP, MVC, UI/UX, ORM, Unit Testing.

Experience

RBC: Operations Officer | Toronto, ON

May 2024 - Present

- Processed 60+ client files daily using RBC systems to verify and validate client information in a high-volume environment.
- Streamlined file review workflows and effectively prioritized urgent and complex cases to improve processing times by 25%.
- Communicated with clients and cross-functional teams to ensure accurate, complete, and compliant documentation.

Ontario Public Service: Developer Co-op | Toronto, ON

September 2024 - August 2025

- Rebuilt and extended 15+ legacy .NET and C# features in Angular as part of a large-scale front-end modernization initiative, delivering a modern, responsive web interface for 100+ internal users.
- Developed Angular features integrated with backend .NET services, SQL databases, and RESTful APIs, updating frontend logic, backend business rules, and database queries in response to evolving requirements.
- Implemented an automated Excel report generation feature that reduced manual report preparation time by approximately 30% by extracting and formatting SQL data using ExcelJS.
- Quickly onboarded to a large legacy .NET and C# codebase, independently navigating existing architecture to implement new Angular features and resolve defects.
- Presented completed features and accessibility improvements during weekly meetings and maintained task updates in Azure DevOps, supporting clear communication and alignment across the developers.

Projects

Online Job Bank System | Java, Swing, SQL, Bash

November 2025

- Developed a multi-role online job portal using Java and Swing, implementing role-specific user interfaces for applicants, recruiters, and companies.
- Implemented backend database functionality using SQL to support job posting, job searching, application submission, and applicant review.
- Integrated Swing-based user interfaces with SQL databases to enable creation, retrieval, updating, and deletion of jobs, user profiles, and applications.
- Collaborated with two other developers to design system workflows, divide responsibilities, and integrate features.

WeatherTracker App | Python, HTML, CSS, SQL, Flask, OpenWeatherMap API

August 2024

- Developed a full-stack weather application that allows users to search for 300+ cities and view real-time weather conditions, forecasts, and temperature data using the OpenWeatherMap API.
- Implemented functionality for users to save and manage favorite cities, storing preferences and location data in a SQL database.
- Designed a responsive user interface using Bootstrap (HTML, CSS, and JavaScript) to ensure consistent usability across desktop and mobile devices.
- Reduced redundant external API calls by 40% by implementing query caching and optimizing data retrieval logic, improving response latency and backend efficiency.

Dance Club Membership Webpage | JavaScript, React, Tailwind CSS, SQL, Express.js, Node.js

April 2024

- Developed a full-stack dance club management system using React, supporting multiple user roles, including members, coaches, and administrators, each with role-specific interfaces and permissions.
- Implemented backend services using Node.js and Express.js with SQL databases to handle authentication, member management, messaging, scheduling, and payment-related data.
- Collaborated with a team of four developers using sprint planning and iterative development to design, implement, and integrate application features.
